

ECOMAT™

Entrance Matting

The ecoMat™ is a unique PVC free, 100% recyclable and re-usable entrance mat made from a proprietary blend of environmental friendly polymers. The ecoMat™ captures and contains dirt and moisture before it enters the building.

The ecoMat™ is suitable for environments where regular trolley wheeled traffic (500 kg max per trolley) and travelator wheeled trolleys up to 300 kg pass over it on a daily basis.

ecoMat™ is Green

- Eco-friendly (PVC-free).
- 100% recyclable.
- Re-usable.
- RoHS Compliant.

ecoMat™ is Strong

- Outperforms traditional rubber and PVC matting.
- Long lasting.
- Pallet-Jack and travelator wheel resistant.
- Unique engineered 'pattern' for optimal durability.

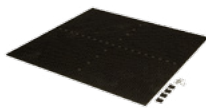

ecoMat™ is Safe

- Prevents Slip and Trip; third party testing shows that the ecoMat™ performs above the generally accepted statistic coefficient of friction (SCOF) of 0.5. Which indicates the ecoMat™ is a "safe" walking surface.*
- ecoMat™ pattern reduces slipping.
- Can be used in combination with the Boston SafeStep™ (heavy duty carpet tiles) and aluminum ramps and dividers.

* Safety Data Sheet and Test Reports are available on request.

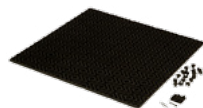

ecoMat™ is Economical

- Easy to fit.
- Easy to clean.
- Quick ROI.
- Modular design.
- Tile configuration allows for improved packaging and transport: less weight = less transport cost.
